aware
aware

aware

Aware is a publication aimed principally at architects and designers, that introduces new, innovative and superior materials, many of which are new to the UK market. Each issue will include a selection of products and a brief summary of their benefits. All are readily available from Ray Munn Ltd, over the counter or ordered from our list and delivered to your site.

Further details are available by either visiting the individual websites or contacting us on 020 736 9876 for a detailed information pack.

Ray Munn Ltd has been established for almost a decade and has acquired a reputation for supplying the very best decorating products that produce outstanding results.

aware is printed on environmentally friendly paper. Fibre source is from fully sustainable managed forests. Environmental accreditation ISO 14001. It is 50% recycled (without use of chloride, a chemical which is often used in bleaching re-cycled paper and damages ozone layer) treated by mills own waste water plant and discharges are below authority standards.

Beckers Paints

A Multiple Choice of Finishes

Unlike any other manufacturer, Beckers paints come in a graded choice of finishes from absolute flat matt to ultra high gloss. The figures in brackets after the description indicate the range between 1-100.

Interior walls

Décor latex tempera – a chalky matt finish with a distemper feel (3)
Helmatt – a dead flat matt finish with a rich depth (5)
Elegant matt – a soft matt finish with a practical washability (7)
Halvblank – a silk finish for moisture environment (35)
Harmonie – a very slightly textured matt finish with high resistance (1-2)

Interior wood work

Aqua matt – a water based eggshell finish (10)
Aqua halvblank – a water based satin finish (40)
Aqua blank – a water based gloss finish (70)
Aqua trabets – a water based woodstain

Exterior walls

Akrylfärg – a semi matt water based durable finish (15)
Putsfärg P – a flat oil based matt finish (4)

Exterior Woodwork

Lackfärg halvblank – an oil based satin finish (35)
Lackfärg Hogblank – an oil based high gloss finish (90)
Oljefärg – linseed based semi gloss finish (50)
Perfekt tacklasyr – water based semi gloss solid stain (50)
Lasyr – oil based woodstain with high uv resistance

Floors

Golvolja – a polishable impregnating oil
Parkettlack – medium duty water based polyurethane varnish in satin or gloss (35 & 80)
Glovfärg V – water based satin finish (35)
Golvfärg – oil based gloss finish (80)
Aquaflor klarlack – water based gloss varnish (80)

Specialist coatings

Vatrumstack – a water based heavy duty semi gloss finish for hospitals and wetroom areas (50)
Epx V – Heavy duty water based 2 pack floor paint (80)

Beckers manufacture an extensive range of primers, glazes, fillers and other decorative products

Beckers manufacture paints that not only exceed the most stringent environmental safety standards but are unparalleled in quality and performance. As a result, most of the indoor product range are endorsed with the prestigious EU flower award for environmentally friendly products.

In a recent study it was demonstrated that due to the advanced structure and elasticity of the paint, a far greater durability was achieved and consequently shrinkage and cracking were reduced. In addition, application time was up to 27% shorter than other leading products on the market.

First established in Sweden over 100 years ago, Beckers has become a leading brand in Scandinavia, producing one of the most comprehensive product ranges that includes ultra heavy duty primers, high durability wood stains, five alternative finishes of wall paint, three finishes of wood paint and the now famous wet room system that achieves a practical alternative to the glazed tile.

All decorative paints, including, those for floor and exterior use, are available in any colour. Designers who wish to match a specific colour can take advantage of the Spectrophotometer which allows samples as small as a 2p piece to be scanned and mixed.

- breathable masonry paint

A breathable, solvent based flat façade paint for painting stucco and concrete. Tack free after 5 hours and recoatable 16 hours, at 23°C and 50%RH. Covers 2-5m²/litre per coat.

Sprayplaster

Sprayplaster is a completely new alternative to traditional plastering methods. Tried and tested over a period of 30 years in Scandinavia, Sprayplaster ensures a perfect finish for paint or wallpapering and provides substantial savings. It was recently demonstrated on a European project of 12,000 sq. mtr, that by using the Sprayplaster system a 30% time and 40% cost reduction were achieved.

Manufactured by Scanpac in Sweden, Sprayplaster is a natural, totally environmentally friendly material made from white Dolomite. It is supplied ready to use and is applied by means of an airless pump, drying in about three hours to a strong and durable finish ready for decorating.

For the decorating professional Sprayplaster is easy to use and with the benefit of our one day practical course operatives will quickly become proficient and achieve excellent results.

Product attributes

- Easy to use.
- Time saving.
- Ensures consistent uniform finish.
- No mixing equipment required.
- No mess – leaving clean, ready to decorate environment unlike traditional plaster methods
- No wastage

Sprayplaster is a complete system. It meets all relevant technical specifications, and through its ease of application ensures economy without compromising the essential premium standards required to produce a quality of finish.

awa

“sprayplaster is a completely new alternative to traditional plastering methods.”

The origins of polished plaster finishes date back to early Venice. As marble would add significant weight to the structure of the buildings, whose foundations were timber piles, craftsmen developed a method of colouring and polishing a lime and marble putty in order to achieve a marble like finish. Arte Nova has now combined an ancient craft with new technology and created a stunning range of products, which not only include the traditional materials of lime and marble, but a totally new range of finishes that are waterproof and can be used in bathrooms and wet rooms. Also available is a metallic finish and an exterior finish that achieves the same classic appearance. The application of Italian and polished plasters requires skill. Trained in Verona Italy by Arte Nova, our team of freelance craftsmen are available to advise on creative finishes and produce results that are visually distinctive and versatile.

Available finishes include:

Stucco Veneziano – highly polished waterproof finish

Caldenova Arredo – highly polished lime / marble finish

Marmorino – matt structured finished

Marmorino Lustro - satin structured finished

Travertino – Matt textured pitted finish

Fiorintino – Satin polished marble finish

Stucco metallo – highly polished metallic finish

Vitrulan Glass 'deco' Wall Fabric

awwa

für das Sortiment bestimmt dauerhaft entwickelt

Vitrulan glass 'deco' wall fabric produces perfect wall finishes. It prevents cracking and covers up existing imperfections, thereby reducing maintenance. Supplied in rolls, one meter wide by 50 meter in length it is easily applied with Vitrulan polymer based adhesive. The ultra high tensile strength of Vitrulan glass 'deco' forms an impact resistant surface, and when finished with Beckers paints, becomes completely washable, making it ideal for home or public spaces. Also, the finished surface can be disinfected making it perfect for sterile environments.

Vitrulan glass 'deco' **wall fabric additional benefits;**

Range of finishes

In addition to the ultra smooth finish there is an extensive range of textures available.

Ecologically sound

- manufactured from quartz sand, dolomite stone, soda and lime.

Fire Rated

- Glass 'deco' fabric does not burn and has been fully tested and accredited to BS 476: part 6- Class 0 and BS 476: part 7- Class 1.

Anti static

- glass does not conduct electricity and glass deco fabric will help reduce static electricity in rooms.

Resistant to mould and fungi

- glass is an inorganic substance and therefore does not provide a breeding ground for growth of micro organisms. Used with special Beckers paints it is ideal for use in hospitals against MRSA. Currently under laboratory testing.
